

Physics Education

Volume 7 1972

Honorary Editor **J Goodier**, BSc, PhD, FInstP, Eton College, Windsor

A bi-monthly journal published by **The Institute of Physics**

Headquarters 47 Belgrave Square, London SW1X 8QX

London Publishing Office 1 Lowther Gardens, Prince Consort Road, London SW7 2AB

Linkage: M F JAMES 235
 Experiments with a 'jumping ring' apparatus: D J SUMNER and A K THAKKAR 238
 Real phase diagrams: E M WRAY 243
 Letters to the Editor 247 Book reviews 251

June 1972

Physics courses 257
 Stock and supply of physicists: P L FLOWERDAY 318
 The physicist in industry: K W HILLIER 322
 Teaching physics: K I DOBSON 326
 Physicists in data processing: D A EYEIONS 328
 Physics careers in medicine: J S CLIFTON 329
 Physicists in management services in the engineering industry: J C R FRENCH 332
 Information industry: scientific writing: A JONES 333
 Technician engineers and technicians: A C GINGELL 335

July 1972

Editorial 337
 Classical mechanics and the air table: A R ROBERTS 338
 Physics education in Ghana: G MCCLELLAND 341
 Physics teaching and the transition from schools to universities: W H JARVIS 347
 Straight edge diffraction using a laser: S GEORGE 349
 Fraunhofer diffraction patterns: G R GRAHAM 352
 Construction and some uses of zone plates: A R JONES, A KOWAL and E R WOODING 361
 Electron diffraction in schools: D S BEARD 363
 X ray reflection and Bragg equation: M F C LADD 368
 Physics Exhibition 1972 educational exhibits: J GOODIER and B G BIGNELL 370
 René Descartes: J L HAWES 371
 The design of experiments and the estimation of experimental errors: D A TAWNEY 377
 A simple approach to experimental errors: M D PHILLIPS 383
 A logical approach to the concept of temperature: R M HELSDON 388
 ASE Scottish Branch Annual General Meeting: W H JARVIS 390
 Mechanical forced oscillation system: P P ONG 391
 Letters to the Editor 394 Book reviews 397

September 1972

School-research laboratory liaison: B E WOOLNOUGH 401

A level physics in a few months: P CRYER 407
 Are fundamental constants really constant?: T P SWETMAN 411
 A simple experiment to determine the speed of light: W GOUGH 413
 Cerenkov radiation: A T JACKSON 415
 Limits on the photon mass: T P SWETMAN 419
 Introducing special relativity using simple geometry: I J SAUNDERS 420
 Comment on the Doppler effect: F R O'NEILL and P B HANNA 425
 Osborne Reynolds: E S GILLESPIE 427
 The future of physics in schools: J GOODIER 429
 The place of science in education: F R JEVONS 430
 Contemporary aspects of atomic physics: R G A KNOTT 433
 Towards more sensible physics: J G WINANS 440
 A simple photoelastic bench: G STANLEY 443
 Double refraction in calcite: D A RICHARDS 447
 X ray Compton scattering: M COOPER 449
 The carat: P DANIEL 454
 Stereographic projections: A A BALCHIN 456
 Letters to the Editor 457 Book reviews 460

November 1972

A simple sound level meter: C F McD WOOD 465
 Joseph Henry and the American Philosophical Society: W E GROSS 471
 The addition of sinusoidal oscillations: R E THURSTANS 479
 Demonstrations of plane waves: D A RICHARDS 482
 Stationary wave demonstrations and the quantum theory of radiation: K F SMITH 485
 The capacitance of a system of concentric spheres: A A WATSON 490
 Surface tension and capillary rise: A J WALTON 491
 BAAS Science Fair: W H JARVIS 499
 Apparatus for the study of the earth: D A MORRIS 501
 A simple tensile testing machine: R MORGAN 503
 Some useful fictions: J ROCHE 506
 The lever as an impedance matching device: I MACINNES 509
 Time-lapse adapter for movie cameras: E G GORGILL, G L PETRICONI and H M PAPEE 511
 A one-dimensional approach to Gruneisen's constant: M A BLACK 515
 Physics on stamps: Appendix III: E J BURGE 519
 The role of history of physics in physics education: B GEE 521
 Letters to the Editor 523 Book reviews 525
